## Work Experiences

### CRM Lead & Full Stack Developer

Reezocar - Paris, France

SINCE OCT. 2016

I've built from scratch and managed the own made CRM of this fast-growing startup, which is used every-day by more than 60 employees.

Most of the sales and after-sales tasks have been automatized in order to focus more on the client's satisfaction.

I was developing in ReactJS & GraphQL 75% of the time and managed projects 25% of the time.

### Software Engineer

Sopra Steria - Sophia Antipolis, France

FROM SEPT. 2015 TO SEPT. 2016

I improved my skills in JavaEE and GWT on a project started from scratch and ordered by the French government to build the biggest retirement management system existing.

### Semantic Web Internship

CNRS & INRIA - Sophia Antipolis, France

FROM MAY 2014 TO AUG. 2014

I contributed to the media part of a web app based on the research subject : Question Answering WikiFrame-work-based System.

It allowed me to work with semantic standards (RDF-S/OWL/SPARQL) with more common languages (Java, JS, REST, JSF).

### Freelance

France

FROM JAN. 2012 TO MAY 2016

As a Freelancer, I've developed Web (JS, PHP, or WordPress) and Android (JAVA) apps for clients in France, Italy, Tunisia and USA.

I built myself a network alongside my studies, which allowed me to learn how to deal with clients.

## Education

### Master's Degree in Business Informatics

Université Nice Sophia Antipolis, France
